

## **Program Evaluation Activity**

Your team will create an evaluation report on your reentry program or reentry activities and deliver it orally, as a team, to the rest of the group. Use your flipchart paper for needed graphics or written material.

To prepare your report:

1. Think about the reentry related programming/activities common to your table.
2. Rate these (reentry related programming/activities) according to how well they meet the following evaluation statements specific to effective reentry efforts:
  - a. Our reentry program/activities lead to more coordinated planning and integrated services among partner agencies.
  - b. Reentering substance abusing offenders receive individualized and comprehensive services.
3. In your assessments for each of the statements, include at least three areas where your program/activities excel and at least three areas that need improvement.
4. For each of the areas that need improvement, provide specific, concrete recommended solutions.
