

Strategies to Improve Treatment Outcomes for Individuals with Fetal Alcohol Spectrum Disorders (FASD) and Their Families (Part 2)

April 28, 2021 | 12:00-1:00pm (PT)

About the webinar

This is a continuation of the webinar that was presented on January 27, 2021 that provided information on FASD and its manifestations in treatment and other settings, with a focus on the brain basis of the behaviors that are often misidentified as willful, manipulative behaviors. In this webinar, we focus on a discussion of the importance of identifying strengths in those with an FASD and those surrounding them, and strategies that can be implemented in treatment settings that can result in better outcomes for the individual and the setting.

Learning Objectives:

By the end of this presentation, participants will be able to:

1. Identify five strengths typically seen in individuals with an FASD.
2. Describe how therapeutic approaches can be modified for those with an FASD.
3. Discuss what adults with an FASD have said is important to them.

When: Wednesday, April 28, 2021
12:00-1:00pm (PT), 11:00am-12:00pm (AKT)

Presenter: Dan Dubovsky, MSW

Technology: This webinar will use the [Zoom](#) platform. Instructions on how to connect will be provided by email when you register.

About the presenter

Dan Dubovsky, MSW has worked for over 40 years in the field of behavioral health as a direct care worker in residential treatment and a therapist in residential and outpatient settings. He has been involved in FASD for over 30 years. For the past several years, he has focused on the development and implementation of a screening, assessment and modification protocol for children, adolescents, and adults. For 15 years he was the FASD Specialist at the SAMHSA FASD Center for Excellence. For his work in FASD, his son Bill has been his mentor and best teacher.
