Description:

This Lecture Series presentation will review frameworks for planning Recovery Support Services (RSS), an important component of the substance use disorder (SUD) treatment continuum. Identifying appropriate supports to enhance an individual's health within, as well as outside of, the context of formal SUD treatment services is an essential component of maintaining a focus on recovery. This presentation will provide participants with information and activities to integrate effective Recovery Support Services (RSS) at different stages along a continuum of care to improve patient retention and engagement. A panel discussion will follow this presentation, featuring representatives from SAPCs specialty treatment provider network, with particular experience or focus on recovery support services. This portion of the presentation is intended to assist SUD providers in identifying and addressing real world considerations in implementing recovery support services.

Objectives: At the end of this presentation, participants will be able to:

1) Formulate two (2) examples of supports within each of the four (4) categories of Recovery Capital.
2) Distinguish two (2) factors that contribute to reduced treatment engagement among people with SUD and other co-occurring chronic health conditions.
3) Analyze two (2) strategies to address cultural and linguistic barriers of access, and participation in Recovery Support Services (RSS) in Los Angeles County.
4) Operate three (3) Recovery Support Services (RSS)-focused quality improvement measures that indicate effective program performance.

Continuing Education:

The training course meets the qualifications for the provision of three (3.0) continuing education credits/ contact hours (CEs/CEHs). UCLA ISAP is approved by the California Association of Marriage and Family Therapists to sponsor continuing education for LMFTs, LCSWs, LPCCs, and/or LEPs (Provider #64812). UCLA ISAP maintains responsibility for this program/course and its content.
