“115 Americans die every day from an opioid-related overdose.”

- Centers for Disease Control and Prevention

**Are your patients among them?
Take a FREE CME pain management and opioids course.**

Newly Updated Curriculum

This newly updated comprehensive course incorporates all six units outlined in FDA blueprint for safe opioid prescribing and provides necessary context for safe opioid prescribing by discussing biopsychosocial aspects of pain, the newest clinical guidelines on the treatment of chronic pain, and state policies about prescribing

opioids.

The intended audience is all prescribers of ER/LA opioids which includes: pain specialists, primary care physicians, physician assistants, nurse practitioners, advanced practice nurses, dentists, addiction medicine physicians, psychiatrists and other physicians and clinicians.

[Learn More](#)

Learning Objectives

- Describe how to accurately assess patients with pain for consideration of an opioid trial.
- Discuss the establishment of realistic goals for pain management and restoration of function.
- Explain how to initiate opioid treatment (IR and ER/LA) safely and judiciously, maximizing efficacy while minimizing risks.
- Describe how to monitor and re-evaluate treatment continuously; discontinue safely when appropriate.
- Discuss how to counsel patients and caregivers about use, misuse, abuse, diversion, and overdose.
- List three ways to educate patients about safe storage and disposal of opioids.
- Demonstrate working knowledge and ability to access general and specific information about opioids, especially those used in your practice.
