

Dear Behavioral Health and/or Substance Use Disorder Provider:

The Mid-America Addiction Technology Transfer Center (ATTC) and Mid-America Mental Health Technology Transfer Center (MHTTC) are conducting a study on the use of virtual behavioral health services during and after the COVID-19 pandemic. We ask that you complete this survey on behalf of the TTC Network because we wish to hear your perspectives on this issue.

If you choose to participate in this voluntary study, please fill out the following survey developed by the Great Lakes ATTC/MHTTC to gain a better understanding of a) how telehealth is being used during the evolving pandemic, b) its benefits, c) its problems, and d) projected use after the pandemic.

Link to survey (you may need to cut and paste into your browser):

<https://redcap.ictr.wisc.edu/surveys/?s=3TTNTF7DL3>

To receive a copy of the survey results for your state, please provide your email at the end of the survey. Survey results will also be available at the following websites:

Mid-America ATTC: <https://attcnetwork.org/centers/mid-america-attc/home>

Mid-America MHTTC: <https://mhttcnetwork.org/centers/mid-america-mhttc/home>

Great Lakes ATTC: <https://attcnetwork.org/centers/great-lakes-attc/home>

Please contact **Todd Molfenter** at todd.molfenter@wisc.edu if you have any questions.

Thank you,

The Teams at the Mid-America ATTC and Mid-America MHTTC
