UCLA ISAP offers two monthly MAT ECHO™ clinics for waived providers and treatment teams to learn evidence-based practices and have an opportunity to present and get feedback on clinical cases. Learn and discuss: Medication Formulations for OUD, Nurse Care Model and Multidisciplinary Teams, Trauma-Informed Approach to MAT, Social Support, Community Reinforcements and MAT, and more.

Project ECHO™ (Enhancing Community Health Care Outcomes) uses a web-based, video-conferencing platform to provide case-based learning opportunities and increase workforce capacity to provide best practice specialty care.
