Perinatal Stigma Prompt and Reminder Posters

Stigma associated with substance use disorders (SUDs) is a significant barrier to identification and treatment efforts. Persons with SUDs who are pregnant and/or parenting are particularly impacted by stigma and may be subject to adverse encounters when seeking healthcare services. The MPATTC developed clinician-focused and client-focused posters to help address barriers associated with perinatal stigma. It is recommended the posters be displayed in locations visible to both clients and clinicians.

These posters can be downloaded from the MPATTC website and include a QR code that can be scanned to access additional MI resources, products, and training found within the ATTC Network. To maximize the impact of these products, display the posters in a location most visible and accessible to clinicians.

The MPATTC is available to answer questions and interested in any feedback you have regarding the posters. Contact us at mpattc@casat.org.
