

Crosswalk of the ASAM PPC-2R Adult Placement Criteria: Levels of Service 0.5 through IV

Criteria Dimensions	<u>LEVEL .05</u> Early Intervention	<u>OMT</u> Opioid Maintenance Therapy	<u>LEVEL I</u> Outpatient Treatment	<u>LEVEL II.1</u> Intensive Outpatient	<u>LEVEL II.5</u> Partial Hospitalization
<i>DIMENSION 1:</i> Alcohol Intoxication &/or Withdrawal Potential	No withdrawal risk	Physiologically dependent on opiates and requires OMT to prevent withdrawal	Not experiencing significant withdrawal, or at minimal risk of severe withdrawal	Minimal risk of severe withdrawal	Moderate risk of severe withdrawal
<i>DIMENSION 2:</i> Biomedical Conditions & Complications	None or very stable	None or manageable with outpatient medical monitoring	None or very stable, or is receiving concurrent medical monitoring	None or not a distraction from treatment. Such problems are manageable at Level II.1.	None or not sufficient to distract from treatment. Such problems are manageable at Level II.5.
<i>DIMENSION 3:</i> Emotions / Behavioral Conditions & Complications	None or very stable	None or manageable in an outpatient structured environment	None or very stable, or is receiving concurrent medical monitoring	Mild severity, w/ potential to distract from recovery; needs monitoring	Mild to moderate severity, w/ potential to distract from recovery; needs stabilization
<i>DIMENSION 4:</i> Treatment Acceptance / Resistance	Willing to explore how current alcohol or drug use may affect personal goals	Ready to change the negative effects of opiate use, but is not ready for total abstinence	Ready for recovery but needs motivating and monitoring strategies to strengthen readiness. Or high severity in this dimension but not in other dimensions. Needs a Level I motivational enhancement program.	Has variable engagement in tx, ambivalence, or lack of awareness of the substance use or mental health problem, and requires a structured program several times a week to promote progress through the stages of change	Has poor engagement in tx, significant ambivalence, or lack of awareness of the substance use or mental health problem, requiring a near-daily structured program or intensive engagement services to promote progress through stages of change
<i>DIMENSION 5:</i> Relapse / Continued Use Potential	Needs an understanding of, or skills to change, current alcohol and drug use patterns	At high risk of relapse or continued use without OMT and structured therapy	Able to maintain abstinence or control use and pursue recovery or motivational goals w/ minimal support	Intensification of addiction or mental health symptoms indicate a high likelihood of relapse or continued use or continued problems w/o close monitoring & support	Intensification of addiction or mental health symptoms, despite active participation in a Level I or II.1 program, indicates a high likelihood of relapse or continued use or continued problems w/o near-daily monitoring and support
<i>DIMENSION 6:</i> Recovery Environment	Social support system or significant others increase the risk of personal conflict about alcohol or drug use	Recovery environment is supportive and/or the client has skills to cope	Recovery environment is supportive and/or the client has skills to cope	Recovery environment is not supportive but, w/ structure & support, the client can cope	Recovery environment is not supportive but, w/ structure & support & relief from the home environment, the client can cope

"Client does not meet any level of ASAM Criteria" <hr/> Clinician _____ Date _____	Level 0.5 ___ OMT ___ Level I ___ Level II.1 ___ Level II.5 ___ Level III.1 ___ Level III.3 ___ Level III.5 ___ Level III.7 ___ Level IV ___	Client requires psychological evaluation: Yes ___ No ___ Not at this time ___ Client requires psychiatric evaluation: Yes ___ No ___ Not at this time ___ No need for treatment at this time ___ Referral out to: _____

Crosswalk of the ASAM PPC-2R Adult Placement Criteria: Levels of Service 0.5 through IV

Criteria Dimensions	<u>LEVEL III.1</u> Clinically-managed Low Intensity Residential Services	<u>LEVEL III.3</u> Clinically-managed Medium Intensity Residential Services	<u>LEVEL III.5</u> Clinically-managed Medium / High Intensity Residential Services	<u>LEVEL III.7</u> Medically-monitored Intensive Inpatient Services	<u>LEVEL IV</u> Medically-managed Intensive Inpatient Services
<i>DIMENSION 1:</i> Alcohol Intoxication &/or Withdrawal Potential	No withdrawal risk, or minimal / stable withdrawal Concurrently receiving Level I-D (minimal) or Level II-D (moderate) services	Not at risk of severe withdrawal, or moderate withdrawal is manageable at Level III.2-D	At minimal risk of severe withdrawal at Levels III.3 or III.5. If withdrawal is present, it meets Level III.2-D criteria	At high risk of withdrawal, but manageable at Level III.7-D and does not require the full resources of a licensed hospital	At high risk of withdrawal and requires the full resources of a licensed hospital
<i>DIMENSION 2:</i> Biomedical Conditions & Complications	None or stable, or receiving concurrent medical monitoring	None or stable, or receiving concurrent medical monitoring	None or stable, or receiving concurrent medical monitoring	Requires 24-hour medical monitoring but not intensive treatment	Requires 24-hour medical and nursing care and the full resources of a licensed hospital
<i>DIMENSION 3:</i> Emotions / Behavioral Conditions and Complications	None or minimal; not distracting to recovery. If stable, a Dual-Diagnosis-Capable program is appropriate. If not, a Dual-Diagnosis-Enhanced program is required.	Mild to moderate severity; needs structure to focus on recovery. If stable, a Dual-Diagnosis-Capable program is appropriate. If not, a Dual-Diagnosis-Enhanced program is required. Tx should be designed to respond to the client's cognitive deficits	Demonstrates repeated inability to control impulses, or a personality disorder requires structure to shape behavior. Other functional deficits require a 24-hour setting to teach coping skills. A Dual-Diagnosis-Enhanced setting is required for the SPMI client.	Moderate severity; needs a 24-hour structured setting. If the client has a co-occurring mental disorder, requires concurrent mental health services in a medically monitored setting.	Because of severe and unstable problems, requires 24-hour psychiatric care with concomitant addiction treatment (Dual-Diagnosis-Enhanced)
<i>DIMENSION 4:</i> Treatment Acceptance / Resistance	Open to recovery, but needs a structured environment to maintain therapeutic gains	Has little awareness & needs interventions available only at Level III.3 to engage and stay in tx; or there is high severity in this dimension but not in others. The client therefore needs a Level I motivational enhancement program.	Has marked difficulty with, or opposition to tx, w/ dangerous consequences; or there is high severity in this dimension but not in others. The client therefore needs a Level I motivational enhancement program.	Resistance is high & impulse control poor, despite negative consequences; needs motivating strategies available only in a 24-hour structured setting. Or, if 24-hr setting is not available, the client needs a Level I motivational enhancement program.	Problems in this dimension do not qualify the client for Level IV services
<i>DIMENSION 5:</i> Relapse / Continued Use Potential	Understands relapse but needs structure to maintain therapeutic gains	Has little awareness and needs intervention available only at Level III.3 to prevent continued use, w/ imminent dangerous consequences, because of cognitive deficits or comparable dysfunction	Has no recognition of the skills needed to prevent continued use, with imminently dangerous consequences	Unable to control use, with imminently dangerous consequences, despite active participation at less intensive levels of care	Problems in this dimension do not qualify the client for Level IV services
<i>DIMENSION 6:</i> Recovery Environment	Environment is dangerous, but recovery is achievable if Level III.1 24-hour structure is available	Environment is dangerous and client needs 24-hour structure to learn to cope	Environment is dangerous and the client lacks skills to cope outside of a highly structured 24-hour setting	Environment is dangerous and the client lacks skills to cope outside of a highly structured 24-hour setting	Problems in this dimension do not qualify the client for Level IV services
