Who should attend:	<ul style="list-style-type: none"> Physicians Registered Nurses/Nurse Managers Clinical Administrators Psychologists LMFTs and LCSWs Certified Substance Use Disorder Treatment Counselors Other Primary Care and Behavioral Health Specialists/Clinicians Any health care provider who wants to improve their capacity to provide culturally responsive care for American Indian and Alaska Native people in California Key Stakeholders (Family Services, Community Supports, Education Departments, Criminal Justice Settings, Consumers.)
---------------------------	--

<p>Training Description and Core Clinical Components:</p>	<p>Integrating culture into clinical practice can increase treatment engagement and success, especially in AI/AN communities. Treatment providers can improve clinical engagement and outcomes by determining an individual’s level of acculturation and adapting treatment strategies, accordingly, including making referrals to culturally based practices. This two-hour interactive webinar will identify cultural traditions of AI/AN people to consider in treatment. The presenters will review an acculturation scale that providers can use to start a conversation about culture. Attendees will have an opportunity to use the scale in small group practice and determine ways to utilize the tool in their own practice.</p>
--	--

<p>Learning Objectives:</p>	<p>At the end of the training, participants will be able to:</p> <ol style="list-style-type: none"> 1. Identify three (3) cultural strategies when engaging American Indian/Alaska Native people. 2. Recall two (2) elements of an acculturation scale designed to address culture for AI/AN people. 3. Specify two (2) examples of integrating findings on acculturation into clinical practice.
